

The eclectic Bolon Eyewear Collection

The **Bolon Eyewear** SS 2022 Collection draws inspiration from the vibrant eclecticism of cities and offers sunglasses that add contemporary elements to a classic design.

The vintage mood featured in some models is combined with a modern style to enhance the brand's cool and fashionable soul. Classic silhouettes alternate with wide, wrap-around designs to dare with a futuristic look; alongside total black sunglasses are models with lenses in bold shades such as yellow and orange.

With his lively spirit and naturally elegant and casual style, **Lorenzo Musetti**, a young up-and-coming Italian tennis player, best represents the values of BOLON Eyewear.

MIC-Made in Cadore portrays the allure of the Dolomites

Retracing forgotten pathways to rediscover the purity of the source. This was the starting place for **MIC-Made in Cadore**, the brand founded and distributed by **Immagin8**. The Dolomite mountains, magnificent source of fascination, continue to inspire the hand of designer **Tiziano Tabacchi**, especially in the new styles where unique craftsmanship and new shades of color redefine excellence.

In the **Fiore** style, the unique cut of the acetate on the front calls to mind the petals of a flower, for an ample, rounded feminine style, also available in shades of avant-garde brown camouflage.
